DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 04 December 2006 has been entered.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Art Unit: 1732

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary.

Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 1-4, 6-8, 10-16 and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Annis et al (U.S. Patent 5,786,065 A) in combination with Michaud (U.S. Patent 7,037,866 B2).

Annis et al (see the entire document, in particular, col. 1, lines 6-10 and 18-21; col. 2, lines 64-67; col. 3, line 54 to col. 10, line 20) teaches a process of making an abrasive nonwoven cloth as claimed, including a step of water entanglement (i.e., hydroentangling), except that Annis et al does not explicitly teach water entanglement (i.e., hydroentangling) to generate a pattern of raised regions and lowered regions, which is taught by Michaud (see the entire

Art Unit: 1732

document, in particular, col. 1, lines 24-30 and 38-41; col. 2, lines 8-10; col. 4, lines 3-26) and such would have been obvious to one of ordinary skill in the art at the time the invention was made in the process of Annis et al in view of Michaud principally in order to manufacture an abrasive nonwoven cloth.

Response to Arguments

6. Applicant's arguments with respect to claims 1-4, 6-8, 10-16 and 28 have been considered but are moot in view of the new ground(s) of rejection.
